

THE NEW SANITARY FLOW THROUGH DAMPENER

# SENTRY CIP

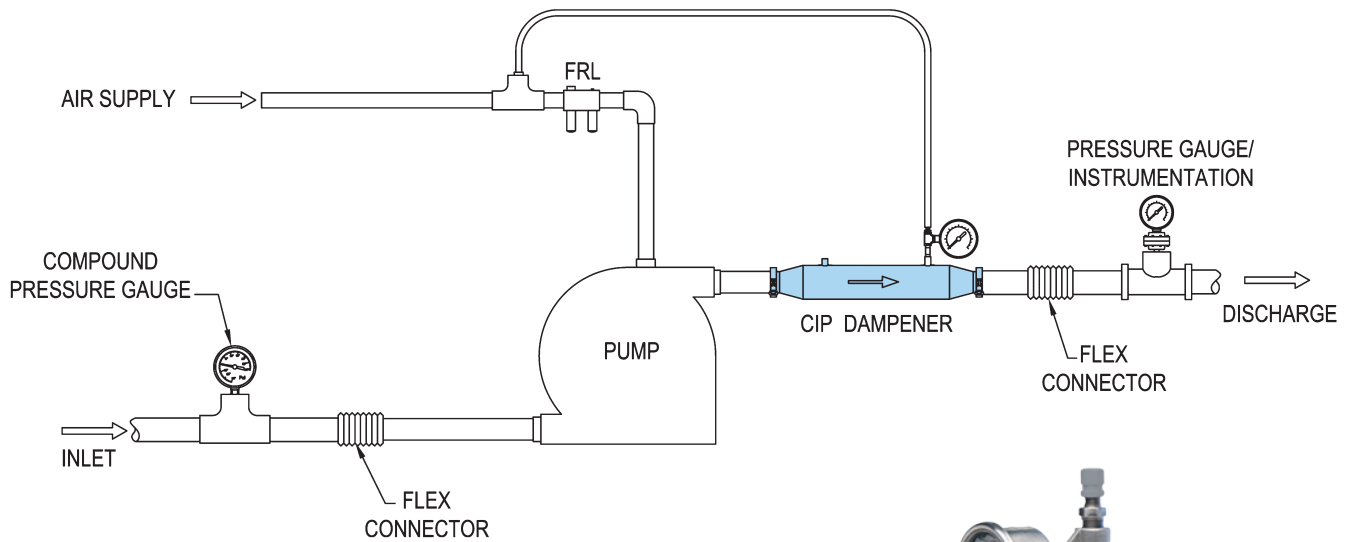

## SPECIFICALLY DESIGNED FOR HYGIENIC CLEAN-IN-PLACE APPLICATIONS

- Inline, flow through design eliminates product holdup
- Self-draining single body construction for easy clean-in-place

## UNIQUE PATENT PENDING TUBE BLADDER

- Internal molded ribs prevent collapse under pressure, replacing other designs with perforated tubes that collect and trap particles
- Molded ends connect directly to pipe and seal with Tri-Clamp fasteners; no separate gaskets required

### SENTRY CIP

- 316L polished stainless steel body with 2.5 inch Tri-Clamp connections
- USP Class VI pharma-grade silicone tube bladder
- Ideally suited for handling slurries and viscous fluids
- Gentle enough for the most delicate products
- End cap option for mounting in vertical position

### INSTALLATION

Install the SENTRY CIP sanitary flow through dampener inline as close to the pump discharge as possible to absorb the pulse at its source.
