

ASEPTIQUIK® S SERIES CONNECTORS

AseptiQuik® S Connectors provide quick and easy sterile connections for small-flow applications, even in non-sterile environments. The "FLIP-CLICK-PULL" design of AseptiQuik S enables users to easily transfer small volumes of media with less risk of operator error than with traditional methods. The connector's genderless and robust design provides reliable performance without the need for clamps, fixtures or tube welders. Biopharmaceutical manufacturers can now make 1/8", 1/4" and 3/8" hose barb and 1/4" and 3/4" sanitary sterile connections with the quality and market availability they expect from the leader in single-use connection technology.

FEATURES

Genderless

FLIP-CLICK-PULL

CPC Click

AQS-MPC Combination

AQS 1/4" Sani with Smooth Bore

BENEFITS

Eases single-use systems specifications with one-part number for both halves

Intuitive three-step connection process reduces risk of operator error

Audible confirmation of connection with no additional hardware required

Enables the ability to change a BPC or other single-use system with open format connections to closed systems

Minimizes transitional flow disruptions throughout upstream processing

TYPICAL FLOW RATE

Cv Value Range: 0.19 - 1.74
for AseptiQuik S

Cv values represent the approximate expected flow rate in gallons per minute of water at room temperature for a 1 PSI pressure drop. The flow is generally constrained by the smallest diameter, which in some cases will be the termination diameter and not the Nominal Flow Path.
