

Flexible Chargebags

The Ezi-Dock Chargebag is a High Performance Flexible Process Package designed to deliver maximum product recovery when handling Pharmaceutical and Chemical Products.

Product Description

One of the many unique features of the Ezi-Dock Chargebag is the 2 ply body design. The 2 ply design not only adds much needed strength to the Chargebag, when connected to heavy "Passives" but also adds a further layer of protection against the risk of pinholing.

Manufactured from a <USP87> + <USP661> Compliant LDPE with a Permanent Non Migrating Anti-Static Additive.

Specification

Ezi-Dock Chargebags are available in 6 standard sizes (other sizes are available on request) each can be supplied with either a 2/4/6inch Tri-Clamp connection:-

- 2 Litre
- 5 Litre
