

RUBBER FAB SANITARY THERMOCOUPLE CLAMP

Hinge Lay-Out: Single Interlocking Rivet

During validation processes it can be desirable to measure temperature or bio-activity. Rubber Fab's Smart Gasket® has proven its value when validating sterility in a high-purity pharmaceutical system. The Smart Gasket® easily installs between two sanitary standard flanges using the Rubber Fab Sanitary Thermocouple Clamp to secure the flanges. The clamp provides up to four internal ports for accepting the Smart Gasket® thermocouple samples or accessories.

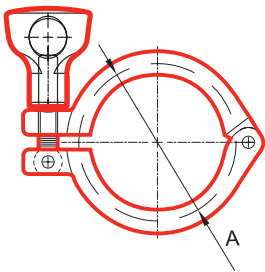

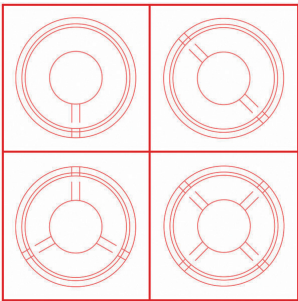

This gives you most reliable values and the right view on your processes.
